**WHERE TO LOCATE DETECTORS:**

Smoke detectors are to be located on every level of a residence, (basement, first floor, second floor) excluding crawl spaces and unfinished attics, and in all separate sleeping areas and living areas such as the kitchen, garage, basement or utility room. In homes with only one sleeping area on one floor, a detector is to be placed in the hallway outside the bedrooms as shown in Figure 1. In single floor homes with two separate sleeping areas, two detectors are required outside each sleeping area as shown in Figure 2. In multi-level homes, detectors are to be located outside sleeping areas and at every finished level of the home as shown in Figure 3. Basement level detectors are to be located in close proximity to the bottom of basement stairwells as shown in Figure 4.

**WHERE NOT TO LOCATE SMOKE DETECTORS:**

To avoid false alarms and/or improper operation, avoid installation of smoke detectors in the following areas:

- Kitchens-smoke from cooking may cause a nuisance alarm.
- Bathrooms-excessive steam from a shower may cause a nuisance alarm.
- Near forced air ducts-used for heating or air conditioning-air movement may prevent smoke from reaching detector.
- Near furnaces of any type-air and dust, movement and normal combustion products may cause a nuisance alarm.
- The 4-inch "Dead Air" space where the ceiling meets the wall, as shown in Figure 5.
- The peak of an "A" frame type of ceiling-"Dead Air" at the top may prevent smoke from reaching detector.

**FURTHER INFORMATION ON DETECTOR PLACEMENT:**

For further information about detector placement, consult the National Protection Association's Standard No. 74-1984, titled "Household Fire Warning Equipment." This publication may be obtained by writing to the Publication Sales Department, National Fire Protection, Batterymarch Park, Quincy, MA 02269.

**WHERE TO LOCATE CARBON MONOXIDE DETECTORS:**

Outside each sleeping quarters in hallway per manufacturer's recommend height. See Owner's manual. If bedrooms are on two different levels or wings, two detectors are required.

**WHERE TO LOCATE FIRE EXTINGUISHER:**

Within 10 feet of kitchen, near room exit or travel path that provides an escape route to the exterior. Maximum height 5 feet with an approved manufacturer's bracket. Extinguisher to be installed with operating instructions clearly visible.

Re: ***Linwood Housing Code***

Dear Sir or Madame:

As of this date, the City of Linwood does not have a housing code applicable to the resale of residential property. However, one and two family residential dwellings are required under the New Jersey Uniform Fire Code 5:70-4.19 to be inspected for heat, smoke and carbon monoxide detector compliance, prior to a change of occupancy. The fee for this inspection is as follows:

1. A request for a CSDCMAC received more than 10 business days prior to change in occupancy: \$35.00;
2. Requests received four (4) to ten (ten) business days: \$70.00; and,
3. Requests received fewer than four (4) business days prior to change of occupancy: \$125.00

A check or money order in the applicable amount payable to "The Linwood Bureau Fire Prevention" shall be paid at the time of the inspection. A CSDCMAC shall not be transferable. If the change of occupancy specified in the application for a CSDCMAC does not occur within six months, a new application shall be required. \*\*\* All application fees are non-refundable \*\*\*

If you have any questions regarding this program, please feel free to contact the Fire Official, Charles Kisby, at (609) 926-7998.

Sincerely,

Jim Galatino  
Construction Official
