City of Linwood
ATTN: Leigh Ann Napoli, City Clerk

Linwood, NJ 08221

Dear Ms. Napoli:

Verizon Wireless is in the process of planning to upgrade and enhance its network for 2017 by deploying small network nodes in the public right-of-way. Part of the planning process includes securing the permissions necessary for that deployment.

Obtaining consent from municipalities to locate and operate in the right-of-way is the first level of permission that Verizon Wireless seeks. Verizon Wireless would like to receive non-site specific consent granting permission to locate and operate in the right-of-way in the City of Linwood by attaching to existing and new utility poles, and would later obtain any required site specific consents for each node through the building departments. As such, Verizon Wireless is requesting consent from the City Council of the City of Linwood to use facilities lawfully erected in the public right-of-way for small network nodes, and respectfully requests to be placed on the next available agenda for consideration of this request by the City Council.

To facilitate this request, Verizon Wireless has provided a fact sheet with details of the proposal, a proposed form of resolution for adoption by the City Council and relevant statutes for reference.

By way of the above, Verizon Wireless hereby submits this application for authorization by the City Council of the City of Linwood to locate and operate small network nodes in the public right of way by attaching to existing and new utility poles.

Verizon Wireless hereby authorizes employees of Tilson Technology Management, Inc. to deliver this request, to represent Verizon Wireless at meetings of the City Council and to discuss this proposal with officials of the City of Linwood.

Questions about this proposal can be directed to William Flanagan at (732) 817-1177, or wflanagan@tilsontech.com. Notices regarding this proposal and hearing date should be sent electronically to wflanagan@tilsontech.com, or by mail to:

Fact Sheet

What is Verizon Wireless Planning in the City of Linwood?

Verizon Wireless is deploying small network nodes in the municipal and county rights-of-way in New Jersey, which enables it to increase coverage and network data capacity. Small network nodes are a low-powered wireless technology that involves the use of antennas, two to three feet long, and radio cabinets, approximately 20-inches wide and 55-inches tall, which are mounted on existing or new utility poles or light poles which are lawfully erected in the public right-of-way. These network nodes augment the coverage from new and existing tower and rooftop sites, providing signal in terrain challenged areas. They are also an important part of Verizon Wireless' capacity focused mobile network. These small network nodes will help provide residents, commuters, and emergency responders in The City of Linwood access to the next generation of wireless networks, and a roadmap toward upcoming emerging wireless technologies like 5G.

Small network nodes are typically deployed in areas that have some existing Verizon Wireless service, but where the coverage needs to be augmented. Capacity may also be exhausted at various times due to high demand when there are many users performing high-data usage functions (streaming video, uploading files, sending photos, using GPS, etc.). This sector exhaust is likely to increase as the technology used by network subscribers on multiple devices becomes exponentially more sophisticated. Without reliable coverage or when sector exhaust occurs Verizon Wireless network users will have insufficient network access, leading to dropped calls, a potential degradation of 911 services, and the inability to access applications, email, internet and GPS, all of which have potential impacts on public safety.

Small network nodes can be used to offload data capacity from the existing sites, freeing them up for others trying to make phone calls and use data anywhere within their radio frequency footprint. They can also be used to augment coverage from the existing macro network. In this way small network nodes complement macro sites, but are not a substitute for them. Small network nodes are located near street level where they can serve high traffic areas such as outdoor recreation facilities, homes, heavily-traveled roadways and intersections. The functional distance of a small network node is dictated by line of sight, and is limited by its low power.

The consent that Verizon Wireless is seeking from The City of Linwood is permission to operate in the public right of way. This consent will not allow Verizon Wireless to construct nodes without site-specific review by the building department.

Why are Small Network Nodes so Important?

Small network nodes fill in coverage and capacity gaps created by both sector exhaust and by the inability of larger macro sites to fill in those small gaps. Providing network coverage and data capacity to all users in both their homes and on the road is increasingly important. Between 2014 and 2015 the number of “wireless only” homes surpassed the number of homes with both landline and cell phone connectivity.

Additionally, the National Highway Traffic Administration reported in February, 2016 that 76% of all 911 calls originate from a cell phone. Having a strong wireless network is not just for convenience, but is also necessary for public safety.

The use of wireless devices is increasing exponentially. In the United States there are 355 million wireless devices in use by 319 million residents (CTIA, June 2015). The demand for wireless data services has nearly doubled over the last year, and is expected to grow 650% between 2013 and 2018 (Cisco, VNI Mobile Forecast Highlights, 2013-2018). The increased use of smart phones, tablets, health monitors and other wireless devices in everyday life relies on the Verizon Wireless Network. Small cell networks will add coverage and capacity and improve in-building coverage, voice quality, reliability and data speeds for The City of Linwood residents, businesses, first responders and visitors using the Verizon Wireless Network. Having adequate coverage has become a necessity of daily life and for public safety.

Are Small Network Nodes Safe?

The FCC, in consultation with numerous other federal agencies, including the Environmental Protection Agency, the Food and Drug Administration and the Occupational Safety and Health Administration, has developed safety standards designed to protect against adverse health effects. The standards were developed by expert scientists and engineers after extensive reviews of the scientific literature related to radio frequency (RF) biological effects. The FCC explains that its standards “incorporate prudent margins of safety.” It explains further that “radio frequency emissions from antennas used for cellular and PCS transmissions result in exposure levels on the ground that are typically thousands of times below safety limits.”

The FCC provides information about the safety of RF emissions from wireless base stations on its website at: <http://www.fcc.gov/oet/rfsafety/rf-faqs.html>. In general, due to their small size, low wattage and limited coverage, emissions from small network nodes are a small fraction of FCC-permitted levels in any publicly accessible area.

Where are Small Network Nodes Placed?

Small Network Nodes are most often attached to wood utility poles in the public right-of-way. Verizon Wireless always looks to attach to existing utility poles as a first option, however, due to utility company restrictions, only a small percentage of existing utility poles meet the requirements for attachment. In situations where, because of utility company requirements, Verizon Wireless cannot attach to existing wood utility poles they will request that a public utility set a new pole for their use. The pole will be set in the public right-of-way, and will be of the same size and type that the public utility is permitted to set in the area so as not to be out of character with the current infrastructure.

In locations where there are no existing wooden utility poles, such as downtown areas or newer subdivisions with underground utilities, Verizon Wireless will not place new wooden poles, and would instead seek to have placed new or replacement stealth fixtures that integrate the small network node equipment into a streetlight structure. This would be a different phase of the development and Verizon Wireless would approach the municipality with a new proposal for this type of development.

Photographic representations of all of the above-referenced small network node deployment types are provided on the following pages.

What is Verizon Wireless seeking from The City of Linwood?

A provision of the New Jersey Public Utility Act, N.J.S.A. 48:3-18 (copy enclosed), permits any company (not necessarily public utilities) to use poles that have been lawfully erected in the public right-of-way. Where the second company is not itself a franchised utility, which is the case with Verizon Wireless, the consent of the municipality is required under N.J.S.A. 48:3-19 (copy enclosed). A form of proposed resolution for adoption to formalize such consent is attached.

Can The City of Linwood Reject the Request?

Under Federal law, specifically Section 253 of the Federal Telecommunications Act, 47 U.S.C. 253 (copy enclosed), the municipality may not withhold approval, but it may impose reasonable conditions, such as requiring insurance and repair to any damage caused, which have been included in the attached proposed resolution.

What Sort of Fee is Allowable?

The City of Linwood may not impose a tax on these facilities, but it is entitled to recover the reasonable costs for actual services that it incurs in reviewing and approving Verizon Wireless' request. The relevant state statute is N.J.S.A. 54:30A-124 (copy enclosed).

What is Verizon Wireless **NOT** seeking to do in The City of Linwood?

Verizon Wireless is aware that many wireless service providers and other telecommunications infrastructure providers are also seeking consent from municipalities in New Jersey to install wireless transmitting equipment in the public rights of way. Understanding the visual sensitivities of residents and City leaders, Verizon Wireless is committed to first, using existing infrastructure, and second, only installing new infrastructure when necessary, and ensuring that any new infrastructure is in character with the existing streetscape. Additionally, Verizon Wireless will not install new wood poles that are substantially taller (10%) than existing utility poles, or install utility poles made of steel or other non-wood material in an area with existing wood utility poles.

Verizon Wireless is seeking this consent exclusively for their own equipment to provide services to customers using the Verizon Wireless network. The consent from the municipality will not be used by Verizon Wireless to construct infrastructure to be leased to others.

B. WHEREAS, the Employee is presently employed by the City as a Sergeant of the Linwood Police Department and has completed fifteen (15) years of service with the City of Linwood Police Department; and

C. WHEREAS, the Mayor and Governing Body of the City recognize the services that the Employee has provided to the City; and

D. WHEREAS, the City, while providing for the continued services of the Employee, is desirous of entering into a Separation Agreement with the Employee that shall embody in writing certain separation arrangements; and

E. WHEREAS, the Employee is desirous of entering into a Separation Agreement on the terms and conditions herein provided.

NOW, THEREFORE, in order to affect the foregoing arrangements, the City and Employee wish to enter into a Separation Agreement on the terms and conditions set forth herein. Accordingly in consideration of the promises and the respective covenants and agreements of the parties herein contained and intending to be legally bound hereby, the City and Employee agree as follows:

1. Incorporation of Recital Clauses. The Recital Clauses of this Agreement are hereby incorporated by reference and made a part hereof.

2. Purpose. The City and the Employee acknowledge and agree that this Contract shall not be construed or interpreted as a contract of employment between the Parties nor shall the terms and conditions thereof constitute or be considered a “past practice” as to the City. However, this Contract shall be binding upon the Parties hereto. The purpose of this agreement is to set forth a date and the terms of separation of the Employee from the City of Linwood, in confirmation of those terms as enumerated in the Agreement between the City of Linwood and New Jersey State Policemen’s Benevolent Association, Inc., Mainland Local No. 77 (Linwood Rank and File) dated January 1, 2016 through December 31, 2021.

The City shall not pay to the Employee any compensation after May 31, 2017 unless provided otherwise herein.

A. Following the Date of Separation, the Employee will complete new applications for the retiree medical plans and will be removed from the current plan. Thereafter,

the Employee's medical benefits, including those of his family, will be in accordance with the terms and conditions of the retiree plan, as set forth under the Agreement, dated August 15, 2016, between the City of Linwood and New Jersey State Policemen's Benevolent Association, Inc., Mainland Local No. 77 (Linwood Rank and File), Article XXV, Section C, despite the fact that Employee has not served twenty-five (25) years with the Linwood Police Department. The City shall not make any voluntary changes in the plans or arrangements, which would adversely affect Employee's rights or benefits thereunder. However, the City shall have the right to unilaterally change the health care/medical coverage plan consistent with what is provided to the Linwood Rank and File under the existing or future Collective Bargaining Agreements with the New Jersey State Policemen's Benevolent Association, Inc., Mainland Local No. 77, provided that Employee and Employee's family shall receive continued health benefits, equal to or better than those provided during employment.

6. Miscellaneous.

A. Waiver and Modification. No provision of this Contract may be modified, waived or discharged unless such waiver, modification or discharge is agreed to in writing signed by the Employee and by the Mayor with the consent of the City Council. Except as otherwise provided herein, no waiver by either party hereto at any time of any breach by the other party hereto or if compliance with any condition or provision of this Contract to be performed by such party shall be deemed a waiver of similar or dissimilar provision or conditions of the same or at any prior or subsequent time.

B. Entire Agreement. This Contract constitutes the entire agreement between the parties hereto with respect to the matters referred to herein. No other agreement relating to the terms of the Employee's employment by the City, oral or otherwise, shall be

binding between the parties unless it is in writing and signed by the party against whom enforcement is sought. C. Governing Law. The laws of the State of New Jersey shall govern the validity, interpretation, construction and performance of this Contract, apply without reference to principals of conflict of laws.

D. Arbitration. Any dispute or controversy arising under or in connection with this Contract shall be resolved by binding arbitration. The arbitration shall be held in Atlantic County, New Jersey and all costs shall be shared equally by the Parties. Except to the extent inconsistent with this Contract, arbitration shall be conducted in accordance with the voluntary labor arbitration rules of the American Arbitration Association then in effect at the time of arbitration, and otherwise in accordance with the principals that would be applied by a court of law or equity. The arbitrator shall be acceptable to both the City and the Employee. Judgment may be entered on the arbitrators' award in any court having jurisdiction under Paragraph 10(F).

E. Validity. The invalidity or unenforceability of any provision or provisions of this Contract shall not affect the validity or enforceability of any other provisions of this Contract, which shall remain in full force and effect to the fullest extent of the law. In the event any section or provision of this Contract shall be deemed to be invalid or unenforceable by a Court of competent jurisdiction, or an administrative body having jurisdiction, the parties hereto shall attempt to agree upon replacement language to give effect to the intent of the parties

and, if replacement language can't be agreed upon, recourse may be sought by either party in accordance with Paragraph 7(D).
